

Warsaw, January 31th, 2025

Second Announcement

Invitation to participate in the **19th Congress of the Polish Biophysical Society (PTBF2025)**

Ladies and Gentlemen, Members and Friends,

We would like to invite you to the [19th Congress of the Polish Biophysical Society](#), which will be held in Warsaw, Poland, on June 23-26, 2025, in the modern building of the Faculty of Physics at the University of Warsaw.

This year's preliminary program for Congress is [presented on the website](#). It is devoted to the issues of Nanomedicine – biophysical aspects, Biophysical insights into protein-ligand complex formation and interaction: techniques and applications, Biophysics of biological systems: from cells to tissues, Medicinal biophysics, Ion channel in the cell biophysics, Medical significance of proteins and nucleic acids, Spectroscopy - ideas, methods, and applications in life sciences, Biosensing and microfluidic systems for disease biomarkers detection in biomedical research, Biophysics of mitochondria, Protein dynamics, disorder, and phase separation, and Others. The final topics will be announced after receiving and verifying the submitted abstracts.

There is space for lectures by recognized researchers and oral and poster presentations by young scientists, the best of whom will be awarded.

We cordially invite scientists, doctoral students, and students dealing with biophysics and related sciences from the border of physics, chemistry, biology, and medicine to participate in the 19th Congress of the Polish Biophysical Society.
